FIRE SAFETY
ESCAPING A FIRE

" Use the back of your hand to test the temperature at the top of door, the knob and the frame before opening. If hot, do not open. Do not use the palms or fingers because, if the door is hot, you will suffer burns "

FIRE SAFETY

ESCAPING A FIRE

≡ " If you are unable to escape through a door, use a window " ≡

FIRE SAFETY

ESCAPING A FIRE

≡ " If you can leave the room, close the door behind you-this will slow down the progress of the fire" ≡

FIRE SAFETY

ESCAPING A FIRE

≡ " If it is too high to jump from a window, tie ≡
sheets together to form a ladder "

FIRE SAFETY

ESCAPING A FIRE

≡ " Do not go back for your possessions " ≡

FIRE SAFETY
ESCAPING A FIRE

" If you are trapped by fire, stay close to the floor-heat and smoke rises "

FIRE SAFETY
ESCAPING A FIRE

" Once clear of the fire, call emergency services "
